DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8, line 2 "ZIP-LOCK" is indefinite because the formula or characteristics of the product may change from time to time and yet it may continue to be sold under the same trademark.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-9, 14, 15, 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rodriguez.

Art Unit: 2831

Rodriguez discloses an apparatus having a front surface and a back surface (Fig 6), adhesive strip (38) or mean (38) for closing open end of said cover, tab (24) comprising fastener (Fig 3), opening (18)

3. Claims 1, 4, 6, 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cadwalader.

Cadwalader discloses an apparatus having a front surface and a back surface (Fig 1A), made of polyethylene (col 3, line 64) comprising means or tabs (18, 20).

4. Claims 1, 6, 7, 11, 15, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Tone et al

Tone et al discloses an apparatus having a front surface and a back surface and perforation (6).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rodriguez

Art Unit: 2831

The teaching of Rodriguez as discussed above does not disclose the opening having semicircular notch.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of Rodriguez by employing the semicircular notch since more than a mere change of form is necessary for patentability.
